- **“Pandemic Culture: Protesting the travel bug in Hamburg,”** *Gavi –the Vaccine Alliance* (2021).

## About the Artist:

LAPIZ is living in Hamburg, Germany but taught himself to paint on the streets of Dunedin (New Zealand). In Africa he worked on HIV but the shocking social contrasts were processed via public interventions. While living in Buenos Aires (Argentina) he started painting huge technical stencils. Their vivid colors scream from between the stencils’ neat lines, sometimes breaking their bounds in an effort to promote truth and provoke dialogue.

His sophisticated works deal with current socio-critical and political issues.
